16 responses

What are the Barriers you face in opting for Eco friendly products?

16 responses

How do you reduce waste of resources ?

16 responses

- Take reusable bags to the store when shopping
- Reduce or eliminate the use of paper plates and cups
- Store leftover foods in reusable containers instead of single use plastic containers
- Donate slightly used clothing, furniture and other items to local non-profit organizations

What is your take on Sustainability?

16 responses

Solar panels

We need to work harder towards sustainable living models. There is inadequate awareness in India about eco conservation.

i save a lot, for me sustainability is not just with the renewable resources.

Easier said than done, I feel the systems around us are designed to make us in sustainable

Sustainability is very much required for all the resources around the world to maintain a balance in the environment.

Use things efficiently

It is the future and will determine the existence of mankind

Really important in today's world especially with the climate change and other

How do you manage over production in your Organistaion? (Type NA if not applicable)
